

# Welcome to Oz. *You belong here.*

The gap was never talent. It was access. **Oz is a cloud security ecosystem** built for the engineers, learners, and builders who were never handed the keys — three worlds, one mission.

**PLATFORM**

## Oz Lunara

See your cloud. Fix what matters.

A decision engine for cloud security posture. AWS, Azure, GCP, Kubernetes, and Cloudflare — one view, real remediation, no vendor-speak.

---

[app.ozlunara.com](https://app.ozlunara.com) →

**UNIVERSITY**

## Oz University

The knowledge that was always locked away.

A community dedicated to supporting cloud security professionals — no matter what stage of career you're at. Real systems, not tutorials.

---

**COMMUNITY**

## Build With Her

The community that came first.

A community for women and the allies who champion them in Cloud, AI, and Infrastructure. 300+ builders and growing.

---

**HOW THE SYSTEM WORKS**

## Belong. Learn. Build.

- 1** **Belong** — join Build With Her. Meet people who are where you were and where you're going. No gatekeeping.
- 2** **Learn** — level up through Oz University. Foundations, cloud security, hands-on labs — at your pace, from any starting point.
- 3** **Build** — put it to work with Oz Lunara. Scan real clouds, see real risk, ship real fixes.

**HOW WE SHOW UP**

## The rules are the culture.

- **Lead with the person, not the threat.** No fear-selling, no gatekeeping, no condescension.
- **No question is too small.** If you wondered it, someone else did too. Ask.
- **Share what you know.** The knowledge that helped you get in helps someone else get in.
- **Self-promo stays in its lane.** Use the dedicated space. Keep the main rooms for conversation.
- **Protect each other's trust.** What's shared in the community stays in the community.

*"Access for everyone who was told this wasn't for them."*
